

FSA Contribution Worksheet

Employee Worksheet

The amount of savings you can achieve through your FSA depends on your spending on health and dependent care, as well as your individual tax situation. To get an idea of your potential savings, you can use the worksheets provided below to determine the appropriate contribution to your account(s).

Calculate the expected expenses for eligible out-of-pocket medical and/or dependent care during the plan year. Please ensure that this calculated amount does not exceed the established IRS and plan limits. It is advisable to be conservative in your estimates to avoid contributing more than necessary, as any unused funds in your accounts cannot be refunded to you.

Medical / Health FSA

Provide an estimate of your eligible, out-of-pocket medical expenses that you expect to incur for the plan year in which you are electing. It's crucial to keep in mind that the IRS contribution limits for the Health Care FSA are determined based on the plan year.
